

PROFESSIONAL SUMMARY

Highly motivated Research Engineer with experience in machine learning and reinforcement learning, seeking to leverage my skills in Python, PyTorch, and TensorFlow to drive innovation in AI platforms. Built and sold a business, now applying systems thinking to the development of safe and beneficial machine learning systems.

CORE COMPETENCIES

Machine Learning

Reinforcement Learning

Python

PyTorch

TensorFlow

Collaboration

Research and Development

WORK EXPERIENCE

Previous Company

2020-2022

Research Engineer San Francisco, CA

- Developed and implemented machine learning models using PyTorch and TensorFlow, resulting in a 25% increase in model accuracy
- Collaborated with cross-functional teams to design and deploy AI-powered systems, improving system efficiency by 30%
- Conducted research in reinforcement learning, publishing papers in top-tier conferences and journals

PROJECTS

Reinforcement Learning for Autonomous Systems Completed

Developed a reinforcement learning framework for autonomous systems, using PyTorch and TensorFlow to improve system performance and safety

PyTorch, TensorFlow, Autonomous Systems

Machine Learning for Healthcare Ongoing

Applying machine learning techniques to healthcare data, using Python and scikit-learn to improve disease diagnosis and treatment

Python, scikit-learn, Healthcare

EDUCATION

Master of Science in Computer Science

Stanford University

2018-2020

Coursework in machine learning, artificial intelligence, and data science, with a focus on reinforcement learning and deep learning

CERTIFICATIONS

Certified Data Scientist, [Data Science Council of America](#)

2020

SKILLS

Technical: Python, PyTorch, TensorFlow, scikit-learn, Autonomous Systems, Healthcare
